

# VITAMIN INJECTIONS

## B12

**\$35**, weekly injection of vitamin B12 (methylcobalamin)-essential for energy metabolism, immune function, and proper digestion and absorption of foods.

## DOUBLE B12

**\$40**, Biweekly injection of vitamin B12

## LIPO B

**\$35**, weekly injection of vitamins, minerals, & amino acids that are essential for liver and overall health. Includes the following key ingredients:

**Methionine:** an antioxidant amino acid that neutralizes free radicals.

**Inositol (Vit B8):** vital for metabolism of fat and cholesterol.

**Choline:** essential nutrient that plays a major role in cardiovascular health in addition to minimizing excess fat in the liver.

**Pyridoxine (Vit B6):** vital to regulating metabolism and keeps the nervous system functioning properly.

**Hydroxocobalamin (Vit B12):** essential for energy metabolism, immune function, and proper digestion and absorption of foods.

## LIPO B+

**\$45**, weekly injection including all of the LipoB ingredients, plus the following added components:

**Thiamine (Vit B1):** helps in the conversion of carbohydrates into glucose, which in turn is used to produce energy. Improves the body's ability to withstand stress and is often called the "anti-stress" vitamin.

**Riboflavin (Vit B2):** helps the body break down carbohydrates, proteins and fats to produce energy, and allows oxygen to be used in the body.

**L-Carnitine:** Compound that helps the body effectively break down sugars and starches to turn fat into energy, and it reduces the accumulation of lactic acid in muscles.
